

Addition and subtraction

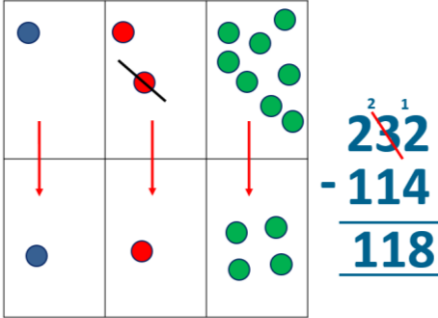

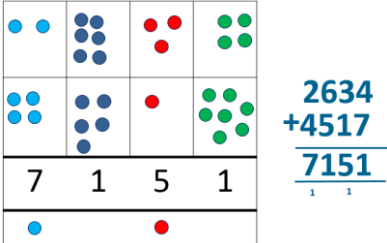

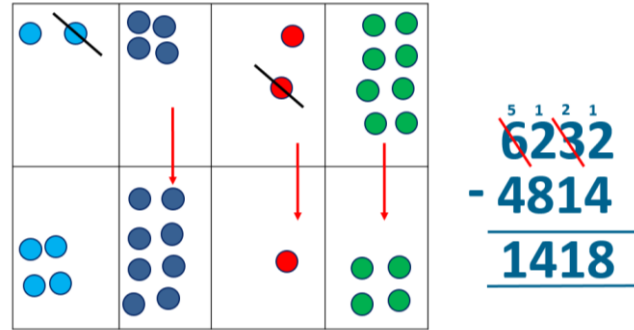

- Add and subtract numbers using concrete objects, pictorial representations.
- All number facts for all numbers 1-10 are secure by the end of Year 1 in order to progress and consolidate decimal numbers in KS2.
- From Year 2, inverse of addition and subtraction to be used to check both written and mental calculations.
- All methods must be supported using a range of counting resources such as numicon, cubes, dienes, coins, counters, bead strings, number tracks, number lines, number squares, cuisinaire, dice, place value counters, double sided counters
- Develop visualising an increasing amount of numbers

	Recall/mental	Mental strategies	Written	Examples	Problem solving
Year 1	<p>To represent and use number bonds and related subtraction facts for all numbers 1-20.</p> <p>Add and subtract one-digit and two-digit numbers to 20, including zero.</p>	<ul style="list-style-type: none"> - count on or back; - biggest number first; - begin to bridge; - use known number facts and place value to add or subtract pairs of single-digit numbers; - add 9 to single-digit numbers by adding 10 then subtracting 1; - identify near doubles, using doubles already known; - use patterns of similar calculations eg. $2 + 3 = 5$ so $2 + 4$ 	<p>Read, write and interpret mathematical statements involving addition (+), subtraction (-) and equals (=) signs</p> <p>Add and subtract numbers including:</p> <ul style="list-style-type: none"> * a one digit number and ones * a two-digit number and ones 	<p>+ Counting all leading to <u>counting on</u>.</p>  <p>+ <u>Counting on</u> using a number track</p>  <p>+ <u>Counting on</u> using a number line</p> <p>$7+4$</p>  <p>- <u>Taking away as counting back</u></p> 	<p>Solve one-step problems that involve addition and subtraction, using concrete objects and pictorial representations, and missing number problems such as</p> <p>$7 = \square - 9$; $20 - \square = 9$; $15 - 9 = \square$; $\square - \square = 11$; $16 - 0 = \square$</p>

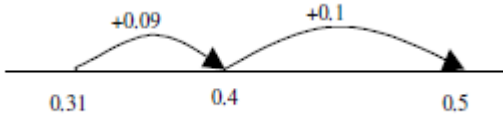

<p>number bonds for multiples of 5 totalling 60 (to support telling time to nearest 5 minutes)</p> <p>Add and subtract numbers mentally, including:</p> <ul style="list-style-type: none"> * a two-digit number and ones * a two-digit number and tens * two two-digit numbers * adding three one-digit numbers 	<p>numbers by putting the largest number first and/or find a pair totalling 10 or 20;</p> <ul style="list-style-type: none"> - partition additions into tens and units then recombine; - bridge through 10 or 20; - use known number facts and place value to add or subtract pairs of numbers; - partition into '5 and a bit' when adding 6, 7, 8 or 9, then recombine; - add or subtract 9, 19, 11 or 21 by rounding and compensating; - identify near doubles; - use patterns of similar calculations; eg. $2 + 3 = 5$ so $2 + 4$ must be 6 (4 is one more than 3) - use the relationship between 	<p>Add and subtract numbers including:</p> <ul style="list-style-type: none"> * a two-digit number and ones * a two-digit number and tens <p>*Written methods are informal at this stage</p>	 <p>Leading to exchanging</p> <p>+ Expanded written method</p> $40 + 7 + 20 + 5 =$ $40 + 20 + 7 + 5 =$ $60 + 12 = 72$ $\begin{array}{r} 40 + 7 \\ + 20 + 5 \\ \hline 60 + 12 = 72 \end{array}$ <p>- Counting back to take away</p>  <p>- Counting on to take away.</p>  <p>Link to finding a difference. Continue to use the bar model.</p> <p>Towards a written method for subtraction</p> <p>Use dienes to partition and take away, first without exchange, then with exchange.</p>	<p>measures</p> <ul style="list-style-type: none"> * applying their increasing knowledge of mental and written methods <p>Solve simple problems in a practical context involving addition and subtraction of money of the same unit, including giving change.</p>
---	--	--	--	--

		addition and subtraction.			
Year 3	<p>Recall and use addition and subtraction facts for 100 (multiples of 5 and 10)</p> <p>Derive and use addition and subtraction facts for 100.</p> <p>Derive and use addition and subtraction facts for multiples of 100 totalling 1000.</p> <p>Add and subtract numbers mentally, including:</p> <ul style="list-style-type: none"> * a three-digit number and ones * a three-digit 	<ul style="list-style-type: none"> - count on or back in tens or ones; - find a small difference by counting up from the smaller to the larger number; - biggest number first; - add three or four small numbers by putting the largest number first and/or by finding pairs totalling 9, 10 or 11; - partition into tens and units then recombine; - bridge through a multiple of 10, then adjust; - use knowledge of number facts and place value to add or subtract pairs of numbers; - partition into '5 and a bit' when 	<p>Add and subtract numbers with up to three digits, using informal methods, progressing to formal written methods of columnar addition and subtraction where appropriate.</p>	<p>+ <u>Partition into tens and ones</u></p> <p>Partition both numbers and recombine. Count on by partitioning the second number only e.g.</p> $247 + 125 = 247 + 100 + 20 + 5$ $= 347 + 20 + 5$ $= 367 + 5$ $= 372$ <p>+ <u>Towards a Written Method for addition</u></p> <p>Introduce columnar addition modelled with place value counters (Dienes could be used for those who need a less abstract representation)</p> <div style="display: flex; align-items: center; justify-content: center;">  <div style="margin-left: 20px;"> $\begin{array}{r} 247 \\ +125 \\ \hline 12 \\ 60 \\ \hline 300 \\ 372 \end{array}$ </div> </div> <div style="display: flex; align-items: center; justify-content: center; margin-top: 20px;">  </div>	<p>Solve problems, including missing number problems (including some 2-step) using number facts, place value, and more complex addition and subtraction</p>

<p>number and tens * a three-digit number and hundreds</p> <p>Add and subtract fractions with the same denominator within 1 whole.</p>	<p>adding 6, 7, 8 or 9; - add or subtract mentally a 'near multiple of 10' to or from a three-digit number; - identify near doubles; - use patterns of similar calculations eg. $12 + 27 = 39$ so $12 + 37$ must be 49 (49 is ten more than 39); - say or write a subtraction statement corresponding to a given addition statement;</p>			<p>+ Leading to formal columnar addition</p> $\begin{array}{r} 247 \\ + 125 \\ \hline 372 \\ 1 \end{array}$ <p>- <u>Towards a written method for subtraction</u></p> <p>Use dienes then place value counters to show column subtraction, without exchange, then with exchange using 3 digit numbers.</p> 	
--	--	--	--	---	--

<p>Year 4</p>	<p>Select a mental strategy appropriate for the calculation.</p> <p>Add and subtract mentally combinations of two and three digit numbers and decimals to one decimal place.</p> <p>Recall and use addition and subtraction facts for 100.</p> <p>Recall and use addition and subtraction facts for multiples of 100 totalling 1000.</p> <p>Add and subtract</p>	<p>Apply the same strategies as in year 3 but using decimals as well as whole numbers.</p>	<p>Add and subtract numbers with up to 4 digits using the formal written methods of columnar addition and subtraction where appropriate.</p>	<p>+ Columnar addition of 4 digit numbers modelled with place value counters.</p>  <p>Progress to subtraction of 4 digit numbers with decomposition, using place value counters.</p> 	<p>Solve addition and subtraction two-step problems in contexts, deciding which operations and methods to use and why.</p> <p>Solve addition and subtraction problems involving missing numbers.</p>
---------------	--	--	--	--	--

	<p>fractions with the same denominator.</p> <p>Derive and use addition and subtraction facts for all numbers 1-10 (with decimal numbers to one decimal place)</p>				
Year 5	<p>Select a mental strategy appropriate for the numbers.</p> <p>Add and subtract numbers mentally with increasingly large numbers and decimals to two decimal places.</p> <p>Add and subtract</p>	<p>Consolidate previous strategies but using two decimal places as well as whole numbers.</p>	<p>Add and subtract whole numbers with more than 4 digits, including using formal written methods (columnar addition and subtraction)</p> <p>Move onto decimal numbers to 2 decimal places.</p> <p>Recognise mixed numbers and improper</p>	$\begin{array}{r} 135.62 \\ + 54.69 \\ \hline 190.31 \\ 111 \end{array}$ <p>Place value counters can be used alongside the columnar method to develop understanding of addition with decimal numbers.</p> <p><u>Use known number facts and place value to subtract</u> $6.1 - 0.4 = 5.7$</p>	<p>Solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why.</p> <p>Solve addition and subtraction problems involving missing numbers.</p>

<p>mentally with increasingly large numbers.</p> <p>Derive and use addition and subtraction facts for all numbers 1-10 (with decimal numbers to two decimal place)</p> <p>Recall and use addition and subtraction facts for all numbers 1-10 (with decimal numbers to one decimal place)</p>		fractions and convert from one to the other.	<p>Find a difference by counting up e.g. $0.5 - 0.31 = 0.19$ This can be modelled on an empty number line (see complementary addition below).</p> 	
--	--	--	--	--

<p>Year 6</p>	<p>Select a mental strategy appropriate for the numbers.</p> <p>Add and subtract mentally combinations of two and three digit numbers and decimals to one decimal place.</p> <p>Perform mental calculations, including with mixed operations and large numbers.</p> <p>Recall and use addition and subtraction facts for all numbers 1-10 (with decimal numbers to two decimal place)</p>	<p>but using two decimal places as well as whole numbers.</p>	<p>Add and subtract whole numbers and decimals using formal written methods (columnar addition and subtraction)</p> <p>Add and subtract fractions with different denominators and mixed numbers, using the concept of equivalent fractions.</p>	<p><u>Written methods</u> As year 5, progressing to larger numbers, aiming for both conceptual understanding and procedural fluency with columnar method to be secured. Continue calculating with decimals, including those with different numbers of decimal places</p>	<p>Solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why.</p> <p>Solve addition and subtraction problems involving missing numbers.</p>
